

SIZE GUIDE: CUFFS

– find your size

CHOOSE THE RIGHT SIZE

Use a measuring tape to measure around your wrist. If you don't have a measuring tape, a piece of string will also work. Twist the string around your wrist and measure the length against a ruler.

You can also measure the circumference on an old cuff. In this case it's important to measure a similar model as the one you want to buy.

CHOOSE THE BIGGER ONE, IF YOU'RE BETWEEN TWO SIZES

CUFFS

The size of our cuffs is indicated either in centimeters or in the sizes XS–XL.

Measure the circumference of your wrist (see image above). The measurement you get is the same as your sizes.

If the size is indicated in XS–XL, compare your measurements in the table below.

	XS	S	M	L	XL
cm	15,2–15,9	16,5–17,1	17,8–18,4	19,7–20,3	21–21,6
inch	6–6.3	6.5–6.7	7–7.2	7.8–8	8.3–8.5
