

SIZE GUIDE: BRACELET WITH CHAIN

– find your size

CHOOSE THE RIGHT SIZE

Use a measuring tape to measure around your wrist. If you don't have a measuring tape, a piece of string will also work. Twist the string around your wrist and measure the length against a ruler.

You can also measure another bracelet. In this case it's important to use a bracelet in the same model as the one you want to buy.

CHOOSE THE LARGER ONE, IF YOUR BETWEEN TWO SIZES

BRACELET WITH CHAIN

Sizes are given in centimeter. Many of our bracelets can be regulated to fit multiple sizes. This is indicated by a “/” between the numbers. Size 15/17/19 will suit you if your wrist is between 15–19 centimeters in circumference.

Keep in mind that the bracelet should not be too tight around your wrist – always choose the larger one if you are between two sizes.

HOW TO MEASURE:

Around your wrist: Measure around your wrist (see image) with a measuring tape or a piece of string. The measure you get is the same as your size.

Another bracelet: Unlock the bracelet and stretch it on a flat surface. Measure the bracelet (incl. décor) with a measuring tape or a piece of string. The measure you get is the same as your size.
